Search for Classes

To search for classes, enter search criteria on the first page. After clicking Search, the Results page will display. On the Results page, use additional filtering criteria to narrow or refine your search.

When logged in, Course Career comes preloaded with your career. If you are in multiple careers, they display alphabetically.

Defaults to the most logical term, either current or next. Reflects all terms going back three years (that exist in that career).

Available Course Subjects display in context of Career and Term.

Once class results display:

- Only the class titles display. You can select the Show Descriptions or Show Sections checkbox (or select them both).

- No prerequisites are displayed until the Details link is clicked.

Details include textbooks, enrollment reqs., capacity, available seats, etc.

Note that attributes can only be chosen under a subject, but they can be chosen without a Course Subject.
Filtering Results

To further refine your search, use any of these filters. When filters are selected, the class results will display immediately.

Classes that meet specific criteria such as foundation or distribution requirements.

Classes hosted by a particular instructor.

Classes that are Open, Wait List, or Closed classes.

Classes held on specific days. For example:

**Limited to these days** with a T/Th selection will show T only, Th only, and T/Th only classes.

**Includes these days** will return the same results PLUS any classes that meet within T/Th as well as a meeting on other days.

Classes held during specific hours of the day or night. The **Include Unscheduled** option allows you to still see classes that are "pick the schedule" versus a specifically assigned time. For example, if you are doing an independent seminar with an advisor, there is no scheduled time.

Classes with variable credit (includes 0 credits).

This filter is most useful for choosing specific summer session classes (SA, SB, S12).

Use this to narrow your search to a lab, recitation, lecture, rotation, etc.

Classes held on a particular campus such as the Museum School, Grafton, Boston, etc.

Classes that require departmental or instructor consent or no special consent.

Once filters are applied, at the top of the page, you may clear them one at a time or all at once. Note that you cannot change anything on the first page of the Search after filters have been applied.

**HIST**: Tu | 12:45PM-5:45PM | Recitation

If you are logged in you can click **Add** to add the class directly to your Shopping Cart. Note that some classes require you to select a faculty member and/or the number of credits.

If needed, clicking **Modify Search** returns you to the first page with the same first page fields pre-filled in.
