

## **TASK ANALYSIS-Take 1**

Task being analyzed: Properly recycling items in the home (from the point of view of the user).

Start of Process: Item is finished being used that needs to be disposed of.

End of Process: Bringing back in large recycling bins after recycling for week has been completed.

Steps:

- I. Finish using product
- II. Decide to dispose
- III. Rinse if necessary
- IV. Take product to disposal area
- V. Decide if recyclable
  - a. If Yes, put product in proper recycling form, throw in the recycling bin or designated location (for objects too large for recycling bin)
  - b. If No, throw product in trash
- VI. Take contents of recycling bin out of home into larger system
  - a. If user is responsible, bring the large recycling bins out
  - b. If user is Not responsible, move to next step
- VII. Replace trash and/or recycling bags in home
- VIII. Bring large recycling bins back in
