

Dry Mouth Study Seeking Volunteers

The Oral Medicine Department at Tufts University School of Dental Medicine is doing research on the effectiveness of two different mouthwashes made for treating dry mouth.

To qualify, you must:

- Be at least 18 years of age
- Suffer from dry mouth
- Be willing to not eat, drink, chew tobacco, chew gum, smoke, brush or floss teeth for 2 hours before each of the 7 study visits

You must not:

- Be pregnant or currently breast feeding
- Be undergoing radiotherapy or chemotherapy
- Have dentures
- Be participating in another clinical study

This is a 7 visit study and each visit will be between 3-5 hours long.

Qualifying participants will receive a \$25 gift card at the successful completion of visit 1 and a \$200 payment after completing each visit afterwards successfully.

This study will take place at Tufts University School of Dental Medicine.

If you have any questions, or think that you may qualify to participate, please contact:

Dr. Mabi Singh (617-636-3931)
