

MIT Introduction to Technology, Engineering, and Science

Join our team of instructors and mentors!

Contribute to life-changing MITES experiences for 7-12th grade students—and play an important role in making STEM fields more diverse, inclusive, and equitable.

We're seeking undergraduates, graduate students, and working professionals who are energetic, thoughtful, and passionate about STEM; we accept applications year-round for a variety of positions.

Choose from

- Remote, in-person, or residential
- Part-time or full-time
- Summer or academic year
- Instructional or mentoring
- STEM, Humanities, or Interdisciplinary
- Various levels of experience

About MITES

MITES (previously Office of Engineering Outreach Programs) provides transformative STEM experiences for middle and high school students from underserved and underrepresented backgrounds—free of charge. For nearly 50 years, we've offered rigorous pre-college STEM programs and rewarding learning opportunities within a warm, close-knit community where students make friends and connections for life.

Our Programs

MITES Saturdays (previously SEED Academy) is a multi-year STEM academy at MIT for 7-12th graders in the Boston area.

MITES Semester (previously MOSTEC) is a hybrid STEM program for rising high-school seniors.

MITES Summer (previously MITES) is a six-week residential STEM experience at MIT for rising high-school seniors.

Why work for MITES?

Drive transformational change for students

Be part of a fun, dedicated learning community

Network and meet like-minded professionals

We encourage those from backgrounds historically underrepresented in STEM to apply—to help students see people like themselves as successful professionals, leaders, and guides in STEM.*
