Cyber Risk Management

June 1 – June 29
Online Executive Course
5 live sessions: Wednesdays, 9:00-11:00 am EST

Taught by Josephine Wolff
Assistant Professor of Cybersecurity Policy
Author of You'll See This Message When It Is Too Late: The Legal and Economic Aftermath of Cybersecurity Breaches (MIT Press 2018).

This course prepares you for the complex process of developing a cyber risk management strategy in a multinational organization.
The organizational risks discussed will include data breaches, online financial fraud, industrial espionage, social engineering, denial-of-service attacks, cloud provider outages, and online extortion.

In this course, you will...

- Gain familiarity with major international policies and frameworks for cybersecurity and cyber risk.
- Learn to apply cybersecurity standards to your organization.
- Perform threat modeling and cyber risk assessment.
- Learn to craft an incident response plan.
- Learn to design a cyber risk management strategy.
