

August 15, 2016

*Nikhil Nair*  
*Chemical and Biological Engineering*

Dear Nikhil,

Each year, graduating seniors are given the opportunity to identify up to three faculty, administrators, or staff members from Tufts who have had a major impact on their undergraduate experience.

I am delighted to report that from the senior surveys completed in May 2016, **3** graduate(s) felt that you were an individual who contributed significantly to the intellectual and personal development of his or her undergraduate experience. If student(s) shared thoughts on how you positively impacted their Tufts experience, I have provided their commentary as an attachment.

Your contribution to the intellectual and personal development of our students and your impact on the academic excellence of the School of Engineering are appreciated. I am grateful for the opportunity to work with you, and extend my sincere thanks.

Sincerely,

Jianmin Qu  
Karol Family Professor  
Dean of Engineering
