

# The Trolley Problem

By Anna Fattaey

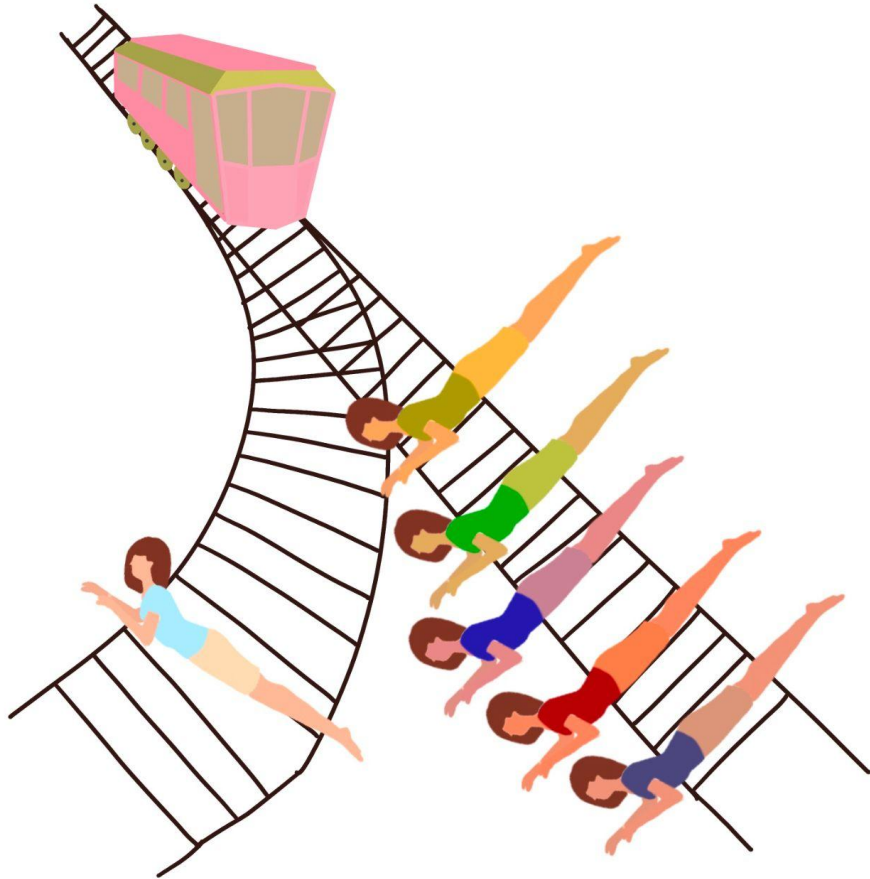

This is Sally

Sally loves her family

And puppies!

Sally has stumbled upon some very broken train tracks

Sarah is stuck to one side of the tracks

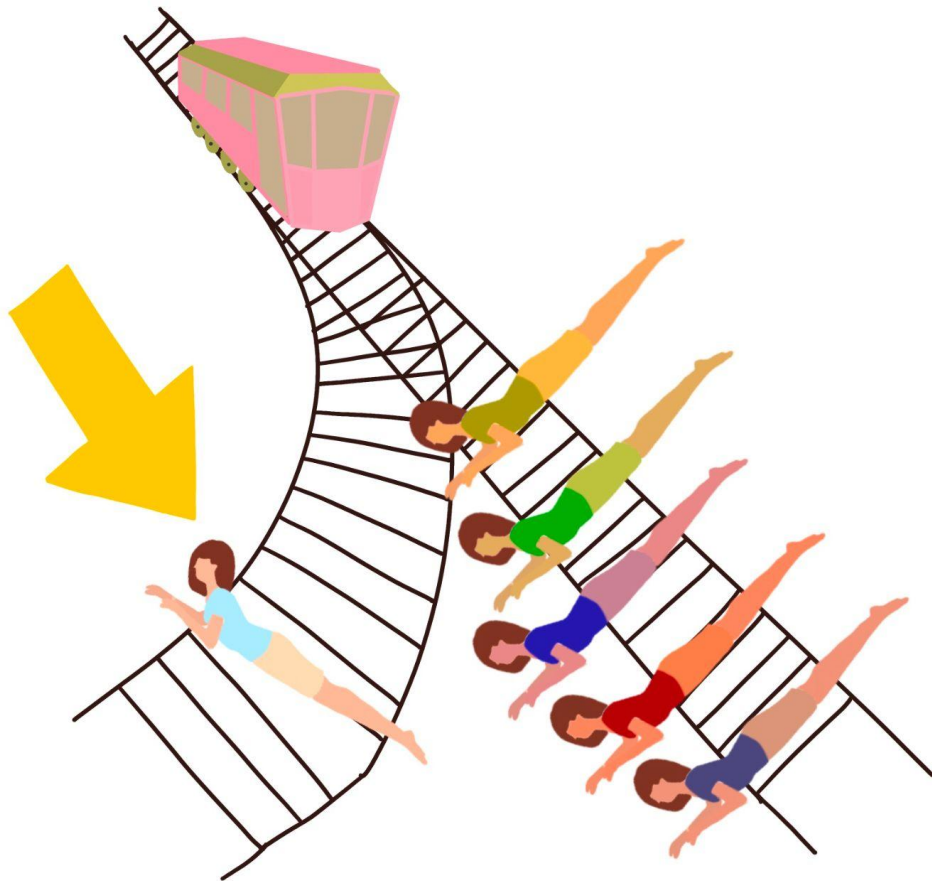

And Molly, Amy, Jen, Grace, and Olivia are on the other side of the tracks

Everyone is superglued to the tracks and it would be impossible to get them off

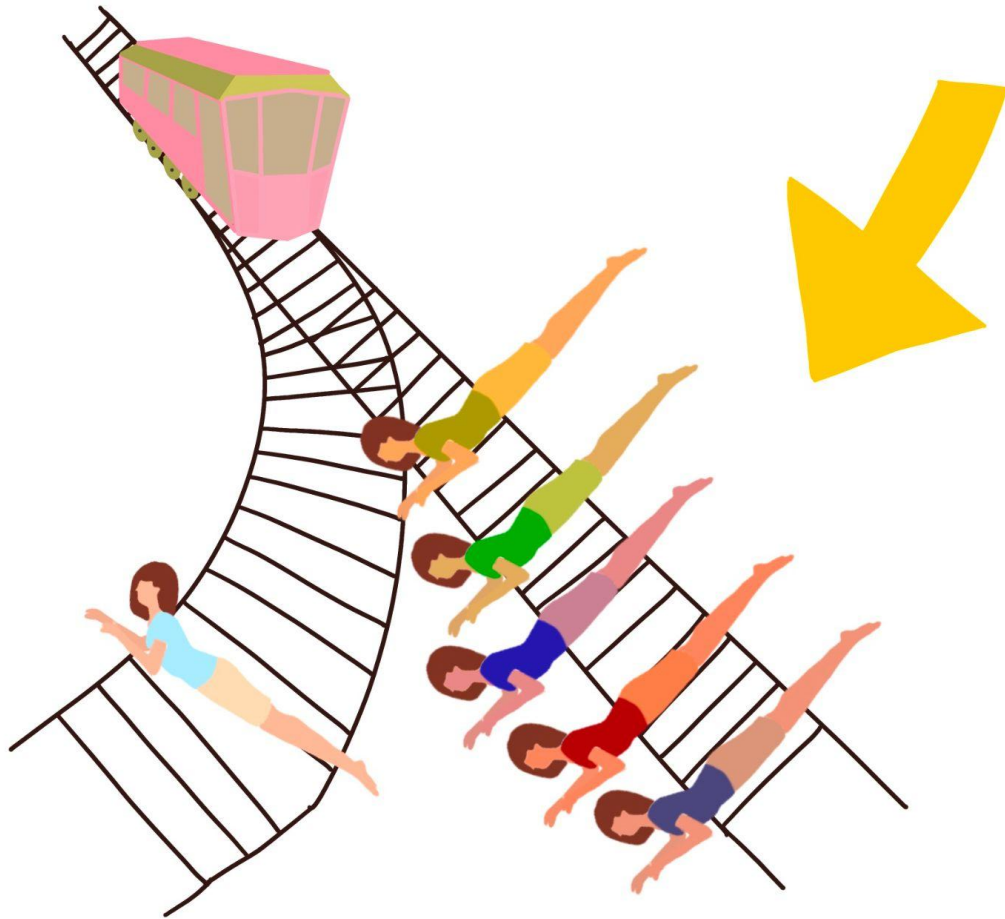

The train is currently heading towards the five people

But there is a lever that Sally can pull

If Sally pulls the lever the train will switch tracks and hit Sarah

But if Sally doesn't pull the lever the train will hit Molly, Amy, Jen, Grace, and Olivia

What should Sally do?

What would you do?

---

What if the one person  
was Sally's mom?

What should Sally do?

What would you do?

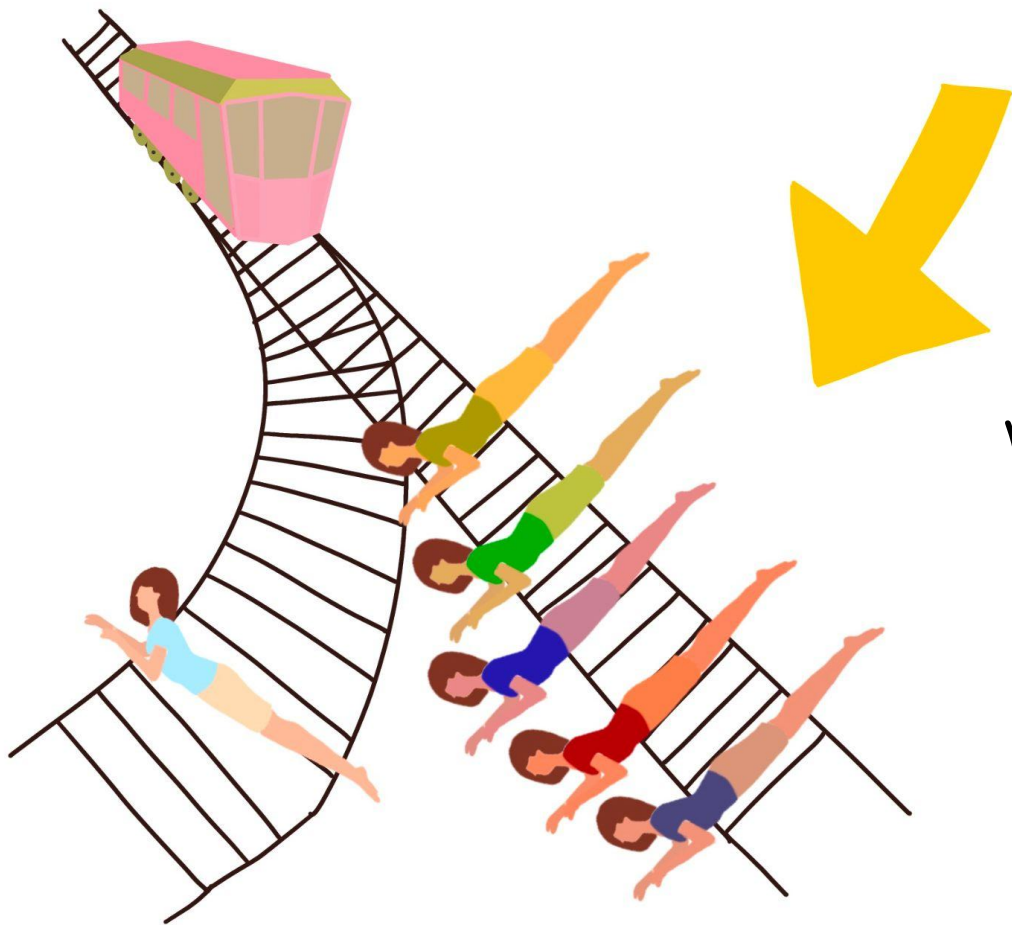

---

What if the one person knew a secret way to make everyone in the world happy?

What should Sally do?

What would you do?

What if Molly, Amy, Jen,  
Grace, and Olivia are bad  
guys?

What should Sally do?

What would you do?

Sometimes in life we have to make hard choices

And sometimes there is not an obvious answer

That's when it's important to do what you think is right
