

CSHD 252: STRUCTURAL EQUATION MODELING

FALL SEMESTER 2021

Reflection Activity #2

Target Submission Date: October 27, 2021

Name: Please type your name here!

We are about halfway through the semester now! Accordingly, this reflection activity is designed as a mid-point “check in” related to this course. I’d like to know how things are going for you so far as well as any potential adjustments to make to the course for the second half.

Beyond-Content/Personal Goals [OPTIONAL SECTION]

1. If you set a goal for this semester outside of the topic matter itself, please briefly describe it here. How would you describe your progress with this goal so far? What have you learned from the process of working toward that goal?
2. Describe your plan related to this goal for the second half of the semester (you could, for example, keep going with, change it, set a new goal, or decide not to stick to only the content-related goals, etc). How can I support you as an instructor in working toward your goals for the second half of the semester?

Course Goals

3. Briefly describe the knowledge goal that you set in Reflection Activity #1. How would you describe your progress toward the goal so far? What have you have learned from the process of working toward that goal?
4. Describe your plan related to this goal for the second half of the semester (you could, for example, keep going with, change it, or set a new goal). How can I support you as an instructor in working toward your goals for the second half of the semester?

Check-In Regarding “Ungrading”

5. How are things going for you with respect to the grading procedures I am trying out this semester (for example, do you feel like you are getting enough feedback about your work)? Do you have suggestions for ways I could improve the grading procedures?
6. At the end of the semester, I will ask you to evaluate your work over the entirety of the course and suggest a grade for yourself. If you were to do that right now, what grade would you suggest for yourself and why? I know it is difficult to do at this point when we have not had many officially graded assignments. However, things you might consider in your assessment: homework assignments, project part 2, post-class questions.

Course Experience

7. Which parts of the course are the most helpful for your understanding and helping you attain your goals?
8. What suggestions do you have about ways the course could be changed in the second half of the semester to better help your understanding and support you in attaining your goals?
9. Anything else you want to share about your experience in the course so far this semester?
