

The Tufts Literacy Corps presents

# Literacy and the Arts

A Different Summer Experience for Elementary School Children

Want to help elementary school children express themselves in writing and feel proud of their accomplishments? Join our summer staff, earn a summer Federal Work Study award, and help local children develop academic skills while you have a great time yourself!

This year, we are running a two-week Science Camp from July 8 – July 19 and a three-week Literacy & the Arts session from July 22 – August 9.

Every morning, you will work with one to three children on a writing project of their choice, as well as on targeted academic skills. During the science program, writing will revolve around a science project of your child's choice. The following Literacy & the Arts session focuses on creative writing, as we use art, literature and drama to inspire children to express themselves on paper. In addition, you will have the chance to help your tutees develop academic skills such as reading fluency and memorizing times tables.

The rest of day is simply fun. L&A counselors lead informal sports on the Tufts fields, run arts & crafts projects, design science experiments, lead drama games and supervise water play at a nearby public pool. Do you enjoy sports, art, science, drama and children? Is there a project you would love to lead this summer? If so – contact [Cynthia.Krug@tufts.edu](mailto:Cynthia.Krug@tufts.edu) and let's talk!
