

Eric D. Tytell

Curriculum Vitae

Department of Biology
Tufts University
200 Boston Ave., Suite 4700
Medford, MA 02155

617-627-0312
eric.tytell@tufts.edu
<http://ase.tufts.edu/biology/faculty/tytell/>

Education

- Ph.D., Biology** **2005**
Department of Organismic and Evolutionary Biology, Harvard University
Supervisor: Dr. George V. Lauder.
- M.Phil., Zoology** **1999**
Department of Zoology, University of Cambridge
Supervisor: Dr. Charles P. Ellington
- B.A., Biology and Physics (Highest honors)** **1998**
Department of Biology, University of North Carolina at Chapel Hill
Supervisor: Dr. William M. Kier

Professional Appointments

- Associate Professor** **2019 – present**
Department of Biology, Tufts University
- Director of Graduate Studies** **2019 – 2021**
Department of Biology, Tufts University
- Assistant Professor** **2012 - 2019**
Department of Biology, Tufts University
- Assistant Research Scientist** **2010 - 2012**
Department of Mechanical Engineering, Johns Hopkins University
- Faculty Research Associate** **2005 – 2010**
Institute for Systems Research, Department of Biology, University of Maryland, College Park
Post-doctoral fellowship in the laboratory of Dr. Avis H. Cohen. Supported by an NIH National Research Service Award.
- Freelance Science Writer** **2004 – present**
Authored stories published in the Los Angeles Times, Boston Globe, New Scientist (London, UK), Journal of Experimental Biology (Cambridge, UK)
- Staff Writer, Los Angeles Times, Los Angeles, CA** **2004 (summer)**
Wrote 21 published stories as a fellow on the science desk. Sponsored by the AAAS Mass Media Fellowship.
- Director of Fluid Dynamics, Nekton Technologies, Inc., Durham, NC** **1999 – 2000**
Supervised testing of a novel biomimetic submarine.

Peer-reviewed publications (*h* index = 24)

1. Jimenez, Y. E., Lucas, K. N., Long, J. H., Jr and **Tytell, E. D.** (2023). Flexibility is a hidden axis of biomechanical diversity in fishes. *Journal of Experimental Biology* **in press**.
2. *Fath, M. A.*[†], Nguyen, S., Donahue, J., McMenamin, S. and **Tytell, E. D.** (2023). Static Stability and Swim Bladder Volume in the Bluegill Sunfish *Lepomis macrochirus*. *Integr Organismal Bio* **5**, obad005. doi: 10.1093/iob/obad005.

3. Mekdara, P. J.[†], Nasimi, F.* , Schwalbe, M. A. B. and Tytell, E. D. (2022). Comparison of aminoglycoside antibiotics and cobalt chloride for ablation of the lateral line system in giant danios. *Integr Organismal Biol*, 4, obac012. doi: 10.1093/iob/obac012.

Grants and Fellowships

Pending

“Collaborative Research: The role of fin mechanosensors in stabilizing swimming in fishes”

2023-2027

National Science Foundation

Eric Tytell, principal investigator. Project to examine how sensory receptors in fish fins contribute to their ability to swim stably. (\$557,730 over 4 years)

Awarded

“CAREER: BIOMAPS: Comparative analysis of locomotor biomechanics and control in fishes”

2017-2023

National Science Foundation

Eric Tytell, principal investigator. Project to study how body shape and mechanical properties in fishes contribute to swimming performance and stability. (\$910,616 over 6 years)

“Reverse-engineering the neuromechanics of swimming in animals”

2021-22

Swiss National Science Foundation

Karen Mulleners, principal investigator. Supports sabbatical research at Ecole Polytechnique Federale de Lausanne, Switzerland. (CHF24,900)

“BII-Design: Integrating Biological Resilience Across Scales”

2021-22

National Science Foundation

Eric Tytell, senior personnel. Proposal to develop a design for a Biological Integration Institute in the Tufts Biology Department. (\$200,000)

“Quantifying three-dimensional internal and external deformations in flexible organisms during locomotion” 2017

Army Research Office

Eric Tytell, principal investigator. Major equipment grant for purchasing high speed cameras and equipment for measuring internal deformations in fishes. (\$163,931)

“HSAP: Coupling Mechanical and Neural Properties for Effective and Adaptable Locomotion” 2017

Army Research Office

Eric Tytell, principal investigator. Summer supplement to support undergraduate or high school researchers. (\$6,000 for summer 2017).

“Dynamic tuning of instabilities for high power movements in deformable structures” 2016-2021

Army Research Office

Eric Tytell, senior collaborator. Proposal to study mechanical instabilities in animals as a way to power high speed movements. (\$1,881,920 over 5 years).

“CAREER: The Multi-functional Foot and its Role in Locomotor Control Across a Range of Complex Media” 2015-2020

National Science Foundation

Eric Tytell, consultant (\$4232 over 5 years). Consulting on development of 3D x-ray particle tracking methods for understanding forces in sand and other granular media.

“Biomechanical tuning of the functional circuit of the lamprey central pattern generator for locomotion” summer 2015

Marine Biological Laboratory

Eric Tytell, principal investigator. Fellowship to support research at the MBL over the summer.

“Coupling mechanical and neural properties for effective and adaptable locomotion” 2014-2017

Army Research Office

Eric Tytell, principal investigator. Proposal to examine the stabilizing properties of the nervous system and muscle in swimming fishes. (\$350 366 over 3 years).

“Neuromuscular control of rapid linear accelerations in fish” 2014-2015

Army Research Office

Eric Tytell, principal investigator. Proposal to study the mechanics and control of linear accelerations in fish. (\$48 157 over 9 months).

“Collaborative Research: Sensory feedback loops in a swimming lamprey: Integrating fluid dynamics, body mechanics, and neurophysiology” 2013-2016

National Science Foundation

Eric Tytell, co-principal investigator. Proposal to study the role of sensory feedback in animal swimming using a computational model of a lamprey. (\$52,970 over 3 years)

“Locomotor stability in a model swimmer: coupling fluid dynamics, neurophysiology and muscle mechanics” 2013-2016

Army Research Office

Eric Tytell, co-principal investigator. Proposal to develop computational models of swimming animals. (\$341 588 over 3 years).

“Cyclical dynamics and control of a neuromechanical system” 2011-2012

Army Research Office

Eric Tytell, principal investigator. Examines how rhythmic neural and mechanical systems respond to perturbations (\$49 797 over 9 months).

- “Multisensory Integration in MSTd for Navigation and Control”** **2011-2014**
Office of Naval Research
 Eric Tytell, co-investigator. Proposal to examine multisensory integration and closed-loop control of movement in primate cortex (\$751 925 over 3 years).
- “Neuromechanics and dynamics of locomotion”** **2011-2016**
National Science Foundation, Research Coordination Networks, Biological Infrastructure
 Eric Tytell, steering committee. Proposal to develop a network for collaborations in biology and mathematics (\$489 290 over 5 years).
- “Biomechanics and the lamprey central pattern generator”** **2005 – 2008**
National Institutes of Health, National Research Service Award (1 F32 NS054367)
 Eric Tytell, PI. Post-doctoral research fellowship (\$140 000), studying the neurophysiology of lamprey swimming.
- Fellow, Harvard University Biomechanics program** **2003-2005**
 Interdisciplinary Graduate Education and Research Training (IGERT) program
- Mass Media Science and Engineering Fellowship** **2004**
American Association for the Advancement of Science
 Summer fellowship as a science writer at the *Los Angeles Times*.
- “Fin-based propulsion for highly maneuverable underwater vehicles”** **2000**
Office of Naval Research (00-SC-ONR-0445)
 Jason Janét, PI. Eric Tytell, co-author. Grant to Nekton Technologies to develop a biomimetic submarine (\$600 000).
- Winston Churchill Foundation Scholarship** **1998 – 1999**
 Scholarship to Churchill College, Cambridge University, Cambridge, U.K.

Selected invited seminars (17 total)

1. **Tytell, E.D. (2021)**. Stability and body mechanics of swimming fish. Presented at the École Polytechnique fédérale de Lausanne Mechanical Engineering colloquium, Lausanne, Switzerland. Oct. 12, 2021.
2. **Tytell, E. D., Carr, J. A., Danos, N., Cowan, N. J. and Ankarali, M. M. (2018)**. Using noisy work loops to identify the phase-dependent stiffness and damping of muscle in lampreys. *Society for Integrative and Comparative Biology*, Symposium on Sensory Feedback and Animal Locomotion. San Francisco, CA.
3. **Tytell, E. D. (2017)**. Neuromechanics of unsteady locomotion in fishes. *International Symposium on Adaptive Movement in Animals and Machines*, Sapporo, Japan.
4. **Tytell, E. D. 2017**. Neuromechanics of unsteady locomotion in fishes. Presented at the George Washington University Mechanical and Aerospace Engineering department seminar series, Washington, DC, Mar. 24, 2017.
5. **Tytell, E. D. 2015**. Neuromechanics and energetics of unsteady locomotion in fishes. Presented at the Temple University Biology department seminar series, Philadelphia, PA, Mar. 16, 2015.
6. **Tytell, E. D. 2014**. The role of mechanical resonance in the neural control of swimming in fish. Presented as part of the International Symposium on Locomotion of Animals, Robotics, and Mathematics, Hokkaido University, Sapporo, Japan, March 21, 2014.
7. **Tytell, E. D. 2013**. Forces, fluids, and feedback: Sensorimotor integration in swimming fishes. Presented as part of the Ecology and Evolutionary Biology seminar series, Brown University, Providence, MA, Apr., 2, 2013.
8. **Tytell, E. D. 2012**. A tale of two fishes: Sensory feedback in lampreys and knifefish. Presented as part of the Concord Field Station seminar series, Harvard University, Bedford, MA, Nov. 8, 2012.

9. **Tytell, E. D. 2012.** Interactions between the nervous system and “passive” mechanical systems: Insights from swimming fishes. Presented at NSF/ARO meeting on Locomotion System Science, Arlington, VA, May 29, 2012.
10. **Tytell, E.D. 2010.** Panel discussion on science writing. Presented at AAAS Mass Media Science and Engineering Fellowship meeting, Washington, DC., Aug. 16, 2010.
11. **Tytell, E.D., Borazjani, I., Lauder, G.V., & Sotiropoulos, F. 2010.** Separating the effects of swimming mode and body shape in undulatory swimming. Part of a symposium on “Contemporary Approaches to the Study of the Evolution of Fish Body Plan and Fin Shape,” at *Soc. Integ. Compar. Bio.*, Seattle, WA., Jan. 4, 2010.

Awards, Honors, and Professional Appointments

Editorial Board Member, <i>Journal of Experimental Biology</i>	2015-present
Editorial Board Member, <i>Scientific Reports</i> (Nature Publishing Group)	2015-2016
Carl Gans Award, <i>Society for Integrative and Comparative Biology</i> In recognition of distinguished contributions to the field of comparative biomechanics.	2012
Featured paper, Inside JEB, <i>Journal of Experimental Biology</i>	Tytell and Lauder, 2008
Featured paper, Inside JEB, <i>Journal of Experimental Biology</i>	Tytell, 2004b
Graduation with highest honors, <i>University of North Carolina</i>	1998
Phi Beta Kappa	1998
Coker Award, <i>Department of Biology, University of North Carolina</i> Best undergraduate thesis in Organismal Biology.	1998
Summer Student Fellowship, <i>Woods Hole Oceanographic Institute</i> Undergraduate research fellowship in fish swimming hydrodynamics.	1997
